

# WELCOME BACK CONGRESS!

**IN THE MONTH YOU WERE AWAY AMERICA'S POPULATION  
INCREASED BY ALMOST 250,000!**

That's 250,000 more people you have to worry about when planning for the future – and the numbers are growing at an alarming rate.

The U.S. Census Bureau reports that last year, the U.S. population grew by 2,743,429 people and the Pew Research Center projects that we can expect today's population of 307 million to grow to almost 450 million by 2050 – just 41 years from now!

It's not too late to get a handle on America's population growth that will seriously exacerbate today's problems relating to soaring federal deficits, health care, Social Security, water and energy shortages, environmental ruin, and numerous other crises.

That is why it is crucial that Senators and Congressmen act today to work with NPG to help create a U.S. Commission on Population Growth.

Establishing this Commission now will provide much needed direction for how our nation can enact responsible population policies. We must put our country on the road to sustainable population levels that will provide a decent quality of life for generations to come.

Population growth is an issue that can no longer be ignored. It is a giant threat to our future. Please act today to take the lead on this issue before it is too late. Please contact us today for information on how we can work together to make a U.S. Commission on Population Growth a reality.

**PLAN FOR THE FUTURE  
CREATE A U.S. COMMISSION ON POPULATION GROWTH TODAY!**
