

NPG

The United States has over 323 million people.

The population is increasing 1 person every 13 seconds.

What does that mean to our forests?

What does that mean for our oceans?

What does that mean to our lakes and rivers?

What does that mean to our air?

What does that mean to our farmland?

What does that mean to for our parks and wildlife?

What does that mean to our energy supplies?

What does that mean for our highways, hospital and schools?

What does it mean for jobs?

And what does that mean to our children?

Visit NPG.org for answers.

And decide what you're going to do about it before it is too late.

NPG: It's not what you think.

It is what you do.

So start for them
