

# Celebrating NPG's 40<sup>th</sup> Anniversary

## WE STAND AS PROUD MEMBERS OF NEGATIVE POPULATION GROWTH!

America's current population growth is already out of control as our elected leaders ignore their responsibility to halt illegal immigration. At the same time they wrongheadedly push for more legal immigration. As American citizens who share a deep concern about the social, economic, and environmental well-being of our nation, we are proud to stand with Negative Population Growth in working toward responsible immigration and population policies that will avert a disastrous future for our country.

The numbers that will bring about America's decline and downfall are already staring us right in the face. Projections are that by mid-century our nation's present population of 314 million will grow to 438 million - with a potential U.S. population of one billion by 2100! A huge percentage of our children and grandchildren born today will still be alive at that time to deal with the dire consequences of our inaction. We owe it to them, and to all future generations, to put programs and policies in place today that will allow them to share in the same quality of life we currently enjoy.

Millions of Americans have worked with NPG during the past 40 years to save our nation from falling victim to overpopulation but we continue to need thousands more citizen activists to work with us toward our goal of a sustainable population. We invite you to visit [www.NPG.org](http://www.NPG.org) and join us today.
