

Dear NPG Supporter:

History is rich with stories about how average citizens, using the power of grassroots activism, help change the world for the better.

As NPG continues its mission to help fix America's broken immigration system and educate our leaders about the dire need to put our country on a sound and sensible population path, we are making a major effort to build a "citizens' army" to help us succeed.

If we are going to prevail, we need you to become more active in this must-win fight.

That is why we are pleased to provide this **NPG Activists' Guide** to inspire you to get involved – at whatever level you choose – to push back against the aggressive open border lobby, speak out against influential growth at any cost proponents, and help expose other negative forces who are constantly working to radically change our communities and destroy America's future quality of life.

As a dedicated NPG supporter, you are already making a difference. Today, I am calling on you to review the information in this pamphlet and decide how you can best increase your role in helping NPG advance our agenda and meet our goals.

Together, we can shape a more positive, livable future for our children, grandchildren and all generations to come.

Sincerely,

Craig Lewis
NPG Executive Vice President

TOP NPG ISSUES

STOP ILLEGAL IMMIGRATION

Fight to better secure America's southern border and pressure Congress to fix our nation's broken immigration system.

DEMAND GOVERNMENT ACTION

Use your voice to force Congress to: change the current rules on birthright citizenship (anchor babies), revise chain migration guidelines and tighten-up asylum policies – all of which are being grossly exploited; pass a law requiring all employers to use the E-Verify system to ensure new hires are legally able to work in our country; and significantly scale back present limits on legal immigration from over 1 million annually to no more than 200,000.

ADDRESS CLIMATE CHANGE

Work to reverse soaring population numbers that will only feed future climate change.

FIGHT SANCTUARY CITIES

Stand up for the safety of your community and make sure elected leaders do not help harbor those who have broken our nation's laws.

DERAIL THE OPEN BORDER MOVEMENT

Help educate the American public that the more we fail to enforce immigration laws and limit the number of new arrivals in our country, the sooner our nation will face economic, social and environmental chaos.

PUSH BACK AGAINST GROWTH

Speak out against greedy civic leaders and developers who are forever pushing communities to accommodate more and more people at the expense of destroying livable towns and cities.

NO AMNESTY FOR ILLEGALS

Help ensure that those individuals who entered our country illegally are not rewarded with the most valuable gift in the world – American citizenship.

ACTIVISTS' GUIDE TO PROTECTING AMERICA'S FUTURE

SPEAK OUT!

GET INVOLVED!

TAKE ACTION!

WORKING TOGETHER,
WE CAN WIN THE FIGHT
AGAINST OVERPOPULATION
AND OUT-OF-CONTROL
IMMIGRATION.

www.NPG.org

The ultimate test of man's conscience may be his willingness to sacrifice something today for future generations whose words of thanks will not be heard.

-Senator Gaylord Nelson, Founder of Earth Day

MAKE A DIFFERENCE!

Population growth affects nearly every aspect of our daily lives. There are numerous areas where your personal activism can make a huge difference!

KNOW THE ISSUES

Being up-to-date on population and immigration issues and incorporating facts into your conversations are an important part of serving as a successful activist. By arming yourself with valuable information to substantiate your position on issues, your input and opinions will be better accepted and respected. NPG's website is a treasure trove of easily accessible information on population-related issues that will help you rally others to our cause.

CONTACT YOUR ELECTED LEADERS

Leaders in Washington, D.C., state capitals, county courthouses and city halls, all make critical decisions that directly impact our daily lives. They were elected to serve you – and answer to you! Be assertive and persistent in reaching out to these policymakers via phone, email, letters and petitions on major national issues such as immigration or state and local issues where the wrong decisions will only feed further population growth.

Both our nation and our planet have limits. Neither can sustain an unlimited number of people.

POPULATION GROWTH IS AMERICA'S SILENT CRISIS!

WRITE LETTERS TO THE EDITOR/JOIN IN INTERNET FORUM DISCUSSIONS

A well-written letter to the editor of a local newspaper or an informed opinion posted on a local website is incredibly valuable in sparking community-wide discussion of important immigration and population related issues. Your opinion matters! What's more, your personal input, ideas and recommendations can serve as a catalyst for your fellow citizens to join you in helping to advance responsible solutions to local problems.

TALK TO ALL WHO WILL LISTEN

Help spread the all-important message that our nation is on a dangerous path if we fail to confront America's skyrocketing population growth before it is too late. We must educate more people about the future economic, social and environmental chaos that will result from destructive immigration policies. Our fellow citizens must understand the need to reduce our country's population to a sustainable level before it is too late.

We still have the power – if we can only develop the will – to halt and reverse population growth. That power, if not exercised, may no longer exist a few years from now.

-Don Mann, NPG President

CALL FOR A HEALTHY ENVIRONMENT

The dangers of an overpopulated America are all around us as we witness non-stop growth taking more and more of a toll on our fragile environment every day. Spread the word as to how climate change, potential water shortages, paved-over farmlands and forests, destroyed wetlands and other deteriorating factors will radically change the quality of life for future generations. The more we put environmental destruction in the forefront of the fight for a smaller population, the easier it is for others to understand how population growth is an issue that cannot be kicked down the road to be addressed in the future.

ATTEND TOWN HALL MEETINGS

A great number of wrong-headed decisions that welcome growth at any cost (versus protecting a community from too many people) are made at the local level. It's vital that you and other citizens stand up, speak out, and stop growth before it spins even more out of control. Making your voice heard at local forums on topics such as increased traffic, overcrowded schools and hospitals, sprawl, and the loss of natural spaces and parks, can pay rich rewards in the future.

"STOP AT TWO"

In the past, it was very common for families to have many children which fed America's ever-increasing population numbers. Thankfully, times have changed. NPG supports the principle of "Stop at Two." To reproduce in large numbers only invites population growth that goes, within a very few generations, from intolerable, to unimaginable, to truly unsustainable.
