

STICK TO THE BASICS

TO PROTECT AMERICA FROM THE DESTRUCTION CAUSED BY OVERPOPULATION!

To: The 117th Congress

From: The Members of Negative Population Growth

We demand that you “stick to the basics” of America’s overpopulation problem as you work to bring relief to America’s suffering cities and citizens. The course ahead has been established by your predecessors and now it’s up to you to act quickly by focusing on the following basic issues causing overpopulation:

1. **Sponsor legal immigration** so we return the fairness and equality to becoming an American citizen. NPG supports legal immigration of no more than 200,000 per year.
2. **Halt illegal immigration** by taking the issue of securing our borders seriously. Sponsor legislation that more accurately detects visa abuse, enforce E-Verification and curb amnesty handouts. You must not swing open our borders and let in throngs of illegal immigrants.
3. **Guard our national resources** by adopting an official U.S. population policy that’s designed to slow, halt, and eventually reverse population growth. Our natural resources are running out because we have too many people depending on them.
4. **Halt climate destruction** by enforcing responsible immigration policies which dramatically reduce our annual emissions. If America rejoins the Paris Agreement, we must have our own house in order to be taken seriously on the world stage.
5. **Encourage smaller families** by providing tax incentives for parents of two or fewer children. Having smaller American families doesn’t mean our nation is any less great – it only means that we have more room and resources so the families we do have are healthy, have access to educational programs and reduce the drain on social services.

**BY REVERSING THE DAMAGING EFFECTS OF OVERPOPULATION,
YOU BRING RELIEF TO AMERICA’S SUFFERING CITIES AND CITIZENS**
