

FOR 50 YEARS WE'VE SHARED THE SAME GOALS!

Today, We Continue To Need Your Help To Met Them!

For 50 years Negative Population Growth has used its leadership to focus Americans on the critical need to confront and resolve one of our nation's most critical problems – population growth.

With a skyrocketing national debt, a decaying national infrastructure, increasing shortages of clean energy and water, and other critical environmental problems, the evidence is all around us that the U.S. urgently needs a smaller, truly sustainable, population.

Today, as America's premier organization dedicated to addressing population issues, NPG continues to drive the debate on the critical need for our country to create a responsible national population policy.

We are working to educate the American people, elected leaders at all levels of government, and especially students who will have to live with the consequences of today's reckless population policies. All Americans must recognize the vital need to advance and embrace bold, innovative ideas and solutions that will halt and eventually reverse our nation's ever-increasing population growth and create a better quality of life for future generations.

With projections showing that the U.S. is on track to add more than 67 million people in less than 40 years, it is absolutely essential that we speak NOW with an even louder and more forceful voice to halt and reverse today's disastrous and destructive population policies!

We invite you to join us as we continue our journey into the next decade and beyond. Please visit our website, www.NPG.org, to sign on as our newest member today.
